

SITE VISIT: CENTINELA MINE
DATE: Wednesday, June 5, 2024

Minera Centinela is part of Antofagasta Minerals, an international mining company based in Chile. Currently the seventh largest copper producer in the country and the fifteenth worldwide, it is committed to virtuous, inclusive and sustainable mining, which is why it works on doing the mining of the future today. This is demonstrated by the innovations in its production cycle, such as the use of non-desalinated seawater, the creation of a solar thermal plant and the use of large-scale thickened tailings technology, in which it is a pioneer worldwide.
