Filial de

**FCM FREEPORT-McMoRAN**

**Minera El Abra**, a subsidiary of Freeport-McMoRan (FCX), is an open-pit copper mining operation that produces copper cathodes, located 75.6 km northeast of Calama, in the Antofagasta Region.

It began operations in August 1996, reaching full and steady operation the following year. Its main milestones include the Sulfolix project, aimed at providing operational continuity to the deposit through leaching processes.

- **Start of operations:** 1996
- **Distance from Antofagasta:** approx. 220 km (3.5 to 4 hours by road)
- **Deposit altitude:** 4,100 m.a.s.l.
- **Production Level:** 99,096 metric tons of copper
- **Staff:** 1,342 workers and 1,343 contractors.

## Personal Protective Equipment (PPE)

Entry to the **Minera El Abra** facilities is subject to compliance with current safety standards. **All visitors must wear their own complete personal protective equipment (PPE)**, which will not be provided at the site. Access will be denied to those who do not meet this requirement.

- ✓ Safety shoes
- ✓ Reflective safety vest
- ✓ Safety helmet
- ✓ Safety glasses
- ✓ Long trousers (optional)
- ✓ Long-sleeve shirt (optional)
