Coya Sur is an **SQM Iodine Plant Nutrition** production centre, which took on a leading role in the production of potassium nitrate in the mid-eighties. Today, KNO₃ is one of the star products of SQM Iodine Plant Nutrition, which has made us the world leader in this market by reaching 110 countries on the five continents, going out to the world through the Port of Tocopilla.

- **Start of operations:** 1928
- **Distance from Antofagasta:** approx. 198 km.
- **Deposit height:** 1,155 m.a.s.l.
- **Production Level:** Production of Specialty Plant Nutrients and Industrial Chemicals (Solar Salts).
- **Staff (not including contractors):** 695 people.

Personal Protective Equipment (PPE)

Entry to the **SQM Iodine Plant Nutrition** facilities is subject to compliance with current safety standards. **All visitors must wear their own complete personal protective equipment (PPE), which will not be provided at the site.** Access will be denied to those who do not meet this requirement.
